

ZEKE LIFE

Step-By-Step Guide to Cleaning Exterior Cockpit Cushions

What You Need:

- Mean Green Cleaner & Degreaser Spray
- Mold & Mildew Remover Spray
- Kitchen Dish Brush & Sponge
- Water Hose & Spray Nozzle

Steps:

1. Unzip fabric and remove the foam from the cushion. Set aside foam to start cleaning the fabric first.
2. Spray Mean Green Cleaner & Degreaser all over the fabric and start scrubbing. Make sure to really get any stains or black spots. Clean and scrub all sides of material - both inside and out.
3. Rinse the cushion with fresh water from a hose. I found that the Flat setting on the nozzle worked best.
4. Spray Mold & Mildew Remover all over the fabric and continue scrubbing. I found that this not only removed any mold spots - specifically on the zipper, but it also made the cushions smell better.
5. Rinse the cushion again with fresh water until all suds are gone and only clean water drips off the cushion.
6. Shake excess water from the cushion and hang overnight to completely dry.
7. Repeat the steps 2 - 6 with the interior foam. And repeat all steps for all of the boat cushions.
8. Once both the foam and cushion are completely dry, put the foam back in the cushion and zip up.

Estimated Time:

30 minutes per cushion. At least 24 hours of dry time.
